

IN THE CLAIMS:

Please cancel Claims 22, 23, 26, 27, 30, and 31 without prejudice or disclaimer of subject matter.

Please amend Claims 20, 24, and 28, as follows.

1-19. (Canceled)

20. (Currently Amended) A document printing system comprising:

a first calculation unit for calculating a font size based on a scaling factor of an output area;

a decision unit for deciding whether the font size calculated by said first calculation unit is smaller than a minimum font size or not;

a second calculation unit for calculating an expansion ratio for expanding the font size to the minimum font size when said decision unit determines that the font size calculated by said first calculation unit is smaller than the minimum font size; and

an adjusting unit for ~~adjusting~~ making adjustment to expand the output area ~~into a plurality of pages~~ based on the expansion ratio calculated by said second calculation unit.

21. (Previously Presented) The document printing system as claimed in claim 20, further comprising a changing unit for changing a font type according to the font size.

22. (Cancelled)

23. (Cancelled)

24. (Currently Amended) A document printing method comprising:

a first calculation step for calculating a font size based on a scaling factor of an output area;

a decision step for deciding whether the font size calculated in said first calculation step is smaller than a minimum font size or not;

a second calculation step for calculating an expansion ratio for expanding the font size to the minimum font size when it is decided in said deciding step that the font size calculated in said first calculation step is smaller than the minimum font size; and

an adjusting step for ~~adjusting~~ making adjustment to expand the output area into a plurality of pages based on the expansion ratio calculated in said second calculation step.

25. (Previously Presented) The document printing method as claimed in claim 24, further comprising a changing step for changing a font type according to the font size.

26. (Cancelled)

27. (Cancelled)

28. (Currently Amended) A computer-readable medium storing thereon a computer program for instructing a computer to execute a method for document printing comprising:

a first calculation step for calculating a font size based on a scaling factor ratio of an output area;

a decision step for deciding whether the font size calculated in said first calculation step is smaller than a minimum font size or not;

a second calculation step for calculating an expansion ratio for expanding the font size to the minimum font size when it is decided in said decision step that the font size calculated in said first calculation step is smaller than the minimum font size; and

an adjusting step for ~~adjusting~~ making adjustment to expand the output area into a plurality of pages based on the expansion ratio calculated in said second calculation step.

29. (Previously Presented) The computer-readable medium as claimed in claim 28, wherein the method further comprises a changing step for changing a font type according to the font size.

30. (Cancelled)

31. (Cancelled)
